

ATTERO RECYCLING PVT. LTD.

Climate Change Policy

Introduction

Climate change is one of the most pressing global issues today. At Attero, we recognize the urgent need for systematic global action to mitigate the impacts of climate change. As a leader in e-waste and Li-ion battery recycling, we are committed to advancing environmental sustainability and promoting a circular economy. Our goal is to revolutionise the recycling industry by setting benchmarks for sustainability and reducing our environmental footprint.

Objectives

Attero aims to:

1. **Enhance Circularity:** Promote circularity through efficient recycling practices and by supporting the recovery and reuse of critical minerals.
2. **Advance Sustainable Practices:** Implement green metal manufacturing processes and maintain a commitment to zero waste, zero landfill, and no wastewater discharge.
3. **Minimize Carbon Footprint:** Maintain low carbon emissions and continuously improve our sustainability practices to meet global climate goals.

Policy Commitments

1. **Measurement and Disclosure:**
 - Annually measure and disclose our total greenhouse gas (GHG) emissions using global reporting platforms.
 - Strive to be the benchmark in the recycling industry for carbon emission footprint and sustainability practices.
2. **Emission Reduction Targets:**

- Set short-term emission reduction targets aligned with the Science Based Targets Initiative (SBTi) and other industry-specific frameworks.
- Develop and implement a comprehensive transition plan to achieve net-zero emissions in line with SBTi's long-term targets.

3. Circular Economy and Resource Efficiency:

- Promote and practice circularity in all operations by maximizing resource recovery and minimizing waste.
- Maintain zero landfill and zero wastewater discharge through rigorous environmental management systems.
- Invest in green metal manufacturing technologies to support sustainable and low-impact production.

4. Scientific Recycling and Innovation:

- Employ scientific and formal recycling methods to ensure high recovery rates and purity in e-waste and Li-ion battery recycling.
- Foster innovation in recycling technologies and practices to improve efficiency and environmental performance.

5. Critical Mineral Supply:

- Support the domestic supply of critical minerals through effective recycling processes, reducing reliance on virgin materials and contributing to resource security for India's development trajectory.

6. Adaptation and Resilience:

- Identify and assess potential physical impacts of climate change by our operations and implement adaptation strategies to address these risks.

7. Energy and Carbon Savings:

- Identify and implement opportunities for energy and carbon savings across our operations through advanced technologies and process improvements.

- Source renewable energy to meet operational needs where feasible.

8. Partnerships and Collaboration:

- Regularly explore and establish partnerships to advance scientific recycling, circular economy, critical mineral security, sustainability and climate change mitigation and adaptation initiatives, including collaborations on innovative recycling solutions.

9. Employee Engagement and Culture:

- Cultivate a culture of sustainability and energy efficiency among employees to drive continuous improvement and innovation in our recycling practices.

10. Promotion and Communication:

- Actively promote Attero's climate change initiatives and sustainability practices to employees, business partners, and stakeholders.
- Provide regular updates to our partners, governments, and other relevant parties on our progress in reducing emissions and enhancing sustainability.

Approval and Implementation

This policy has been approved by Attero's Board of Directors and will be enforced across all operational units within Attero. Compliance and progress will be monitored to ensure effective implementation and continuous improvement.

Policy Review and Updates

This policy will be reviewed periodically to ensure its effectiveness and relevance. Revisions will be made as necessary to align with evolving best practices, regulatory requirements, and organizational goals.

Conclusion

Attero is dedicated to leading the recycling industry in sustainability and environmental responsibility. Through the implementation of this policy, we aim to contribute positively to mineral resource security, global climate goals, sustainability and advance the circular economy.
